

HighpowerOne Access Control

Touchscreen access control panel supporting eight doors per panel.

Provides installation freedom for most applications.

Operates as a stand-alone device via touchscreen OR with management software.

- **Get off the job quickly without involving your customer's IT department...or network the panel.**
- Integrated 7" touch screen supporting all management functions.
- Uses standard Wiegand or Track II clock-and-data type readers.
- Millions of card ID capacity per panel.
- Schedule, holidays, access levels, automatic door unlocking and card expiration date management.
- Migrate to networked software control when required using on-board Wi-Fi and wired Ethernet.
- Included software with hardware: the Highpower Management System (HMS) provides real-time activity reporting and client-server multi-user operation on a SQL Server database. HMS clients run on Windows, Mac and Linux.
- Door position switch inputs (DPS) and Request to Exit (RTE) inputs on every door.
- Large audit trail. View the audit trail on screen or retrieve it via USB memory stick or software.
- OSDP V2.2 Support for 8 readers. OSDP over RS485 or Ethernet TCP/IP networks.
- Also available in a four-door model.
